RENEWED PETITION UNDER 37 CFR §1.47(a)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Commissioner:

This is a renewed petition for proceeding with the Declaration signed by one of the two inventors, the second inventor refused to sign.

The original petition was filed September 25, 2006 and was accompanied by a Declaration signed by one of the two joint inventors. The signature was not dated. That Declaration included error in the identification of the subject patent application. The error was made without deceptive intent. Applicant files herewith a Supplemental Declaration by one of the two joint inventors containing a correct reference to the subject patent application.

Applicant files herewith the Supplemental Declaration of William Bachand who personally put a copy of application S/N 10/533,696 into the USPS package EQ057152391US, sent that package to Mr. Pedersen, and received that package unopened as returned mail from USPS. William Bachand states that the application that was sent to Mr. Pedersen in USPS package EQ057152391US was a copy of application S/N 10/533,696. The Declaration of William Bachand filed April 6, 2007 referred to the subject application with the same error as contained on the original Declaration by inventor Roc Lastinger.

Having corrected the record and met all of the requirements defined in the dismissed petition, Applicant respectfully requests grant of this renewed petition.

Respectfully submitted,

Date: 4/12/07

William R. Bachand

Title:	Adaptive Broadband Platforms And Methods Of Operation		

SUPPLEMENTAL DECLARATION OF WILLIAM R. BACHAND

I, William R. Bachand, do hereby declare and state as follows:

1. On November 7, 2003 I prepared and filed the international PCT Patent Application entitled "Adaptive Broadband Platforms And Methods Of Operation" serial number PCT/US03/036077 in the US/RO naming Erling J. Pedersen and Roc A. Lastinger as inventors on the Request filed therewith.
2. On May 3, 2005 I prepared and filed US Patent Application serial number 10/533,696 entitled "Adaptive Broadband Platforms And Methods Of Operation" naming Erling J. Pedersen and Roc A. Lastinger as inventors on the Transmittal Letter filed therewith. US application 10/533,696 is the US national phase application of PCT application serial number PCT/US03/036077 and is a copy of that PCT application. I retained a true and complete copy of US application 10/533,696 in my files.
3. On August 8, 2006 I personally prepared and personally mailed USPS package EQ057152391US which contained:
 - (a) a letter (copy already of record) to Erling Pedersen asking him to review of an enclosed patent application, to sign an enclosed Declaration, and to FAX back to me the Declaration he signed;
 - (b) a Declaration and Power of Attorney (copy already of record) signed by Roc A. Lastinger but missing a date of signature; and
 - (c) a true and complete copy of the United States Patent Application entitled "Adaptive Broadband Platforms And Methods of Operation", now application serial number 10/533,696 that was filed on May 3, 2005.

4. Soon after August 17, 2006, I personally received the USPS package EQ057152391US that was returned to me unopened. I opened that package and have in my files the entire contents of that package as described above.
5. On April 6, 2007 I prepared and filed a Declaration of William Bachand initially describing some of the events further described above. However, I later discovered that the Declaration and Power of Attorney (item (b) above) was missing the date of signature of Roc A. Lastinger and used an incomplete identification of the subject matter of that Declaration and Power of Attorney. The incomplete identification included the title of the invention, the US application serial number 10/533,696, and the filing date of its parent PCT patent application, namely Nov. 7, 2003. It is incomplete because the filing date of US application serial number 10/533,696 and the serial number of its parent PCT patent application PCT/US03/036077 were omitted. These two applications are identical. That incomplete identification was used in the Declaration of William Bachand filed April 6, 2007 to identify the application papers sent on August 8, 2006 to Erling Pedersen.
6. This Supplemental Declaration of William Bachand more fully describes items (b) and (c) above.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or patent issuing thereon.

 April 12, 2007

William R. Bachand
Reg. No. 34,980

DECLARATION AND POWER OF ATTORNEY

As a below named inventor, I hereby declare:

THAT my residence, post office address and citizenship are as stated below next to my name.

THAT I believe I am an original, first and sole (if only one name is listed below) or a joint inventor (if plural inventors are named below) of the subject matter which is claimed and for which a patent is sought on the invention entitled: **Adaptive Broadband Platforms And Methods Of Operation**, the specification of which was filed with the USPTO May 5, 2005 as US Patent Application S/N 10/533,696 (the subject application) which is the national stage filing of PCT Patent Application S/N PCT/US03/036077 which was filed with the US/RO November 7, 2003.

THAT the subject matter of the

☐ attached amendment

OR

☐ amendment filed on (_____)

was part of my or our invention and was invented before the filing date of the original application, above identified for such invention.

THAT I do not know and do not believe that this invention was ever known or used in the United States of America before my or our invention or discovery thereof, or patented or described in any printed publication in any country before my or our invention or discovery thereof, for more than one year prior to this application.

THAT the invention was not in public use or on sale in the United States of America for more than one year prior to this application.

THAT this invention has not been patented or made the subject of an inventor's certificate issued before the date of the application in any country foreign to the United States of America on an application filed by me or my legal representatives or assigns more than twelve months before this application.

THAT I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

THAT I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56, including for continuation-in-part applications, material information which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

THAT no application(s) for patent or inventor's certificate on this invention or discovery has been filed by me or my legal representatives or assigns in a country foreign to the United States of America more than 12 months prior hereto, unless identified here: _____

THAT I hereby claim foreign priority benefits under Title 35, United States Code §119 (a)-(d) or §365(b) of any foreign application(s) for patent or inventor's certificate, or §365(a) of any PCT international application which designated at least one country other than the United States of America, listed below and have also identified below, by checking the box, any foreign application for patent or inventor's certificate, or of any PCT international application having a filing date before that of the application on which priority is claimed.

Prior Foreign Application Number(s)	Country	Foreign Filing Date (MM/DD/YY)	Priority Claimed?		Certified Copy Attached?	
			YES	NO	YES	NO

THAT I hereby claim the benefit under Title 35, United States Code §119(e) of any United States provisional application(s) listed below:

Application Number(s)	Filing Date (MM/DD/YY)
60/425,016	Nov. 8, 2002
60/328,909	Oct. 11, 2001

THAT I hereby claim the benefit under Title 35, United States Code §120 of any United States application(s), or §365(c) of any PCT international application designating the United States of America, listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States or PCT International application in the manner provided by the first paragraph of Title 35, United States Code §112, I acknowledge the duty to disclose information which is material to patentability as defined in Title 37, Code of Federal Regulations §1.56 which became available between the filing date of the prior application and the national or PCT international filing date of this application.

U.S. Parent Application Number	PCT Parent Number	Parent Filing Date (MM/DD/YY)	Parent Patent Number (If applicable)
10/269,115		Oct. 7, 2002	7,181,206
	PCT/US03/036077	Nov. 7, 2003	

And as a named inventor, I hereby appoint the following registered practitioners to prosecute this application and to transact all business in the United States Patent and Trademark Office

connected therewith and with the resulting patent, individually and collectively. Please direct all correspondence to the following address:

William R. Bachand, Reg. No. 34,980
Bachand Law Office
P.O. Box 54244
Phoenix, AZ 85078

telephone number (602) 326-6237 to whom all communications regarding the subject application are to be directed.

I hereby declare further that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true, and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
